

Before and after your visit

Patient name: _____ DOB: _____ Today's date: _____

Before your appointment

- Confirm that your visit is for the noninvasive Face applicator. Tell us about electronic or metal implants, pregnancy, impaired sensation, active skin disease, cold sores, recent facial procedures, fillers and previous skin reactions.
- Arrive with clean treatment skin. Staff will advise about makeup, creams, hair and removable jewelry. Do not stop prescribed medicines without the prescribing clinician's instructions.

During treatment

- The applicator produces heat. Tell staff at once about burning, painful heat, sharp pain or a change in sensation; ask for a pause if you are uncomfortable.

After treatment

- Temporary redness, warmth, dryness or mild swelling may occur. Handle the area gently; use the cleanser and moisturizer your clinician recommends.
- Use sun protection. If the skin is intact and your clinician permits, use broad-spectrum SPF 30 or higher. Ask before restarting irritating skin-care products or another facial treatment.
- Your clinician will set the next session and assess whether maintenance is needed.

When to contact us

- Report blistering, a burn, broken skin, increasing pain, unexpected pigment changes, worsening swelling or persistent altered sensation. Eye pain or vision changes need urgent medical assessment. Call 911 for trouble breathing, swelling of the tongue or throat, chest pain, collapse or stroke symptoms.

Patient initials: _____ I acknowledge receipt of these instructions.

A copy will be kept in my patient record.
